The main idea for the lettering came from different inputs, such the aesthetic inclination over clean typefaces (as Helvetica), and the aim to build a concrete, effective, and custom-made logo.

Starting from a Grotesque-family tyeface, the overall structure and the single lecttrs have been customized to recall the concept of balance between chaos and order, and have a reference with the cyrillic alphabet.

The lettering also comes with a logomark obtained with the fusion between the first and the last letters: E and C.

Beside the concept of a symbol that could visually hold the beginning and the end of the name itself, I found nice the similarity with a dreamcatcher, which recalls the dreamy-side of the music.

Also, is well suitable as icon on social medias.

The logomark could also evolve as a graphic element that could push forward the application in merch-design, live visuals, and other promotional material.

This element was obtained creating a rotative pattern of the logomark, and recalls the more structured side of the music.
